

## Gerlach Building of the Humboldt University of Berlin

Philippstr. 12, 10115 Berlin

execution period:	May 2016 - November 2016
client:	Humboldt University of Berlin
architect:	Thomas Müller, Ivan Reimann Architects
order volume:	141.157,- Euro
utilisation:	university building
service	Attic conversion
specification:	

## detailed service description:

The Gerlach building was built in 1873 by the architect Julius Emmerlich as an extension of the Anatomical Theatre.

It was conceived as an autopsy building and on the 1st floor it housed the pathological anatomical collections.

The building connects with a small bridge directly to the Anatomical Theatre of Langhans. The Anatomical Theatre was completely renovated by 2012. Ahle, Fischer & Co. carried out the restoration of the dome and the flat roof in several stages and renovated the existing roof structure according to the historical model.

In Gerlachbau we were commissioned with renovation and repair work on the roof construction.
